

YouTube Performance & Engagement Dashboard

Power BI Data Analytics Assignment

Understanding YouTube's Global Impact

YouTube has transformed into the world's premier video-sharing platform, connecting millions of creators with billions of viewers daily. This comprehensive analytics dashboard provides deep insights into channel performance, engagement patterns, and emerging trends across the platform.

Built using Power BI, the dashboard tracks critical metrics including upload frequency, view counts, subscriber growth, and category rankings to help creators and marketers optimise their content strategies.

Dashboard Overview

Upload Tracking

Monitor video frequency and content consistency across channels

View Analytics

Analyse viewership patterns and engagement metrics

Subscriber Growth

Track audience expansion and retention rates

Category Ranking

Compare performance across content categories

The dashboard combines multiple visualisations with interactive filters, enabling users to explore data by category, channel type, and time period for rapid insights.

Key Performance Metrics

9M

Total Uploads

Combined video content
across all tracked channels

301K

Max Uploads

Highest upload count by a
single channel

1

Min View Rank

Best position in view-based
rankings

541K

Avg Views (30 Days)

Average daily views over
recent period

Upload Trends Analysis

Trend Observations

The analysis reveals a gradual decline in upload frequency across major channels with more than 200,000 uploads.

Key Channels

- ABP News
- Aaj Tak
- IndiaTV

These channels show variation in content frequency, indicating strategic shifts in their publishing approach.

Channel Type Performance Comparison

Category-wise Subscriber Distribution

Category Breakdown

The treemap visualisation clearly illustrates subscriber distribution across YouTube categories.

Leading Categories

1. Entertainment
2. People & Blogs
3. Music
4. Gaming
5. Comedy
6. Film & Animation
7. Education

Entertainment dominates the subscriber base, followed by People & Blogs and Music categories.

Top YouTubers Insights

T-Series

Category: Music

Leading music channel with billions of views and massive subscriber base

Cocomelon

Category: Education

Top educational content with exceptional engagement from children and families

SET India & Sony SAB

Category: Entertainment

Major entertainment channels with consistent high views and strong engagement

These leading channels demonstrate the importance of content consistency, quality production, and understanding target audiences to achieve sustained growth.

Category Ranking Analysis

Entertainment

Highest overall ranking with maximum engagement

Music

Second position generating highest view counts

People & Blogs

Moderate performance with growing subscriber base

Gaming

Moderate engagement with dedicated audience

Comedy & Others

Smaller but consistent contribution to overall metrics

Key Insights & Recommendations

Entertainment Dominance

Entertainment category leads in engagement metrics, demonstrating strongest audience connection and viewing patterns

Music's View Power

Music generates highest view counts, showing strong viral potential and repeat viewing behaviour among audiences

Educational Growth

Educational and children's content shows rapid growth trajectory, indicating expanding market opportunity

Category Impact

Content category strongly influences performance metrics, subscriber growth, and engagement levels

Strategic Recommendations

- Adopt data-driven strategies to optimise channel growth and content planning
- Focus resources on high-performing categories aligned with audience interests
- Maintain consistent upload schedules to build audience expectations and loyalty
- Optimise content specifically for engagement through thumbnails, titles, and descriptions
